

We are an ambitious MedTech spin-off from ETH Zurich whose goal is to improve the quality of life of people with movement impairments. We use state-of-the-art technologies that offer people new ways to be physically active. Our flagship product is the Myosuit: a lightweight and affordable robotic device that gives people an extra layer of muscle to improve strength and stability.

We are increasing our team to help more people benefit from our technology. For that reason, we are looking for a

## Junior Quality Manager in MedTech

As MyoSwiss' Junior Quality Manager, you will be responsible for all quality-related issues, approvals, and audits. You will:

- Maintain and update the quality management documentation
- Report to the management on the performance and status of the QMS
- Participate in management reviews
- Participate in audits (internally and externally at suppliers)
- Instruct and train employees in the QM system and support the product-relevant implementation of applicable legal requirements in cooperation with the divisional managers
- Keep up to date with all standards, regulatory requirements, and guidelines applicable
- Be responsible for keeping technical files complete and up to date

### What you offer

- University degree in applied sciences or similar
- Experience in risk and project management
- Fluent in German and English, any other foreign language is an advantage
- Strong communication skills and an independent way of working

### **What we offer**

- An exciting and stimulating working environment in a young and dynamic team from all over the world
- Highly dynamic work environment
- The unique opportunity to be part of an international growth strategy

Are you interested? We look forward to receiving your application! Please attach your CV and a motivation letter explaining why you are the right person for our team. Send your application to **careers@myoswiss.com**. Applications from employment agencies will not be considered.
